| | The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply | | | | | | | | | |
| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filled after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). | | | | | | | | | | |

DETAILED ACTION

Applicant's arguments filed 6/20/08 with respect to the rejection(s) of the claim(s) under 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made as follows:

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 23 and 26-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watanabe (of record).

Watanabe teaches a microwave (i.e. RF) MMIC (e.g. see Fig. 11) including: Lange directional couplers (e.g. 10,20) and resistor terminations (e.g. 15, 25) for reflection elimination (e.g. see Col. 1, lines 57-63) (Claims 28, 30, 31); Fig. 11 also shows the port 11 is coplanar and inherently is connected to a line to allow an input/output signal (Claim 27); and the terminations 15 and 25 are arranged symmetrically with respect to the signal paths (Claim 32).

Also, inherently the terminations of Watanabe are capable of being removed, especially since they are in an MMIC circuit and are the same structurally as the Application/Control Number: 10/517,301

Art Unit: 2817

presently claimed structure. Thus the terminations of Watanabe could be removed by a laser in the same manner as Applicant's invention.

However, Watanabe does not explicitly teach that the inductors are microstrips (Claims 23, 29), or that the circuit is a test circuit (Claim 26).

It would have been considered obvious to one of ordinary skill in the art to have formed the generic inductors of Watanabe as microstrips, because microstrips are a well-known art-recognized equivalent means for forming inductive transmission signal paths for microwave communications.

Also, as an obvious consequence of the device being the same structure as the presently claimed invention, obviously it can be used as part of a test device in the same manner as the present invention claims.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are most in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen E. Jones whose telephone number is (571)272-1762. The examiner can normally be reached on Monday through Friday from 9 AM to 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert J. Pascal can be reached on 571-272-1769. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
